

DEACTIVATION INSTRUMENTS OF PAYMENT GRIDLOCKS

Piotr MASIUKIEWICZ – Przemysław BONDAROWSKI

Institute of Value Management, Warsaw School of Economics
Technical Analyst, Brokerage House of mBank

Abstract

The first chapter of this article concerns the problem of payment gridlocks in the European Union. In the second chapter the authors focus on the description payment gridlock factors (in this chapter, the authors refer to the study of 800 Polish companies). In the chapter 3 were discussed selected deactivation instruments of payment gridlocks (New UE regulations, Cash flow loan, Factoring). In Chapter 4, the authors indicated (on the basis of study conducted by Intrum Justitia in 2013) a very low level of knowledge in Polish companies about the new regulations on payments in the economy.

Key words: deactivation instruments, small business, payment gridlocks (bottle neck)
